EXPERIENCE

Signal, Chicago, IL — Senior Development Manager

May 2010 - August 2018

I was one of the original programmers at Signal (né BrightTag) where I was involved in writing many of Signal's core services, which were primarily written in Java, Ruby, and Python. I was involved in writing both mobile SDKs (iPhone and Android). For the last year and a half, I was manager of the Data Engineering Team, which was responsible collecting and transforming all the statistical data that was collected on the site.

Rearden Commerce, Foster City, CA — Principal Engineer

January 2008 - April 2010

I lead travel-based projects in Rearden Commerce' SaaS based system. This was primarily a J2EE based architecture: Spring, Struts, Java, Oracle.

Orbitz, Chicago, IL — Technical Manager

July 2001 - December 2007

I was involved in writing many of the back-end travel services (written in Java) that processed airline bookings. I managed Northwest Airlines reservation website, which was a team of 7 people that developed the website that performed NWA's bookings. Managed the front-end team.

Google Cloud
Ruby
Kafka
Guice
Node
Python
Spark

PROJECTS

Chicago Food Truck Finder
<http://www.chicagofoodtruckfinder.com> A website that geolocates food trucks on Chicago streets. This is an ongoing project of mine since 2011. I have wrote iPhone and Android apps, and have integrated with two GPS providers that food trucks wire into their trucks.
