## EXPERIENCE

### Digital Fleet, Chicago, IL — *Principal Engineer*

September 2018- Present

I was involved in doing full stack development in C# on web services built on the .NET platform. I've spent an equal amount of time doing Android development in Java for Digital Fleet's tablet application.

### Signal, Chicago, IL — *Senior Development Manager*

May 2010 - August 2018

I was one of the original programmers at Signal (né BrightTag) where I was involved in writing many of Signal's core services, which were primarily written in Java, Ruby, and Python. I was involved in writing both mobile SDKs (iPhone and Android). For the last year and a half, I was manager of the Data Engineering Team, which was responsible for collecting and transforming all the statistical data that was collected on the site.

### Rearden Commerce, Foster City, CA — *Principal Engineer*

January 2008 - April 2010

I lead travel-based projects in Rearden Commerce' SaaS based system. This was primarily a J2EE based architecture: Spring, Struts, Java, Oracle.

## ADDITIONAL WORK EXPERIENCE

Google Cloud  
Ruby  
Kafka  
Guice  
Node  
Python  
Android

## PROJECTS

**Chicago Food Truck Finder**  
<http://www.chicagofoodtruckfinder.com> A website that geolocates food trucks on Chicago streets. This is an ongoing project of mine since 2011. I have wrote iPhone and Android apps, and have integrated with two GPS providers that food trucks wire into their trucks.
