## EXPERIENCE

### **divvyDOSE, Chicago, IL — Senior Engineering Manager**

February 2019 - Present

Responsible for design and development of cloud-based services for a pharmacy operating system. I do everything from high-level architectural design, mentoring team members, story writing, defining metrics and dashboards, defining test plans, collaborating with stakeholders and the C-suite, performing code reviews, and writing code.

### **Digital Fleet, Chicago, IL — Principal Engineer**

September 2018- February 2019

I was involved in doing full stack development in C# for web services that were built on the .NET platform. I spent an equal amount of time doing Android development in Java for Digital Fleet's tablet application.

### **Signal, Chicago, IL — Senior Development Manager**

May 2010 - August 2018

I was one of the original programmers at Signal (né BrightTag) where I was involved in writing many of Signal's core services, which were primarily written in Java, Ruby, and Python. I was manager of the Data Engineering Team for the last 2 years I was there.

September 1989 - June 1994

## SKILLS

Engineering Management

Java

Python

AWS Cloud

Google Cloud

IAC

Serverless

## PROJECTS

### **Chicago Food Truck Finder**

<http://>

[www.chicagofoodtruckfinder.com](http://www.chicagofoodtruckfinder.com)

A website that geolocates food trucks on Chicago streets. This is an ongoing project of mine since 2011. I have written iPhone and Android apps, and have integrated with two GPS providers that food trucks wire into their trucks.
