About Me

I am a developer and manager with over 25 years in software development. I currently work at Signal where I manage the Reporting and Data Distribution Teams. My side project is [The Chicago Food Truck Finder.](http://andrewviolette.net)

Skills to Pay The Bills

Java is my favorite language but I'm also reasonably proficient in Ruby, Javascript, and Objective C (I can also read python, but rarely write it). I've worked with many cloud technologies, queues, and databases.

Academics and Employment

Dept. of Defense
Computer Sci Co-op
